SUMMARY

Computer Science Engineering student specializing in Cyber Security, with practical experience in **full-stack web development, REST API development and integration, database-backed applications, and Python-based cybersecurity tools**. Experienced in building responsive web applications, implementing authentication and CRUD workflows, and developing backend functionality using Flask and Supabase. Used Google Cloud in a web project and have foundational knowledge of AWS. Active participant in CTF competitions and technical hackathons.

TECHNICAL SKILLS

Programming: Python, C, Java, JavaScript, SQL

Web Development: HTML5, CSS3, JavaScript, React.js, Vite, Responsive Design

Backend & APIs: Flask, REST API Development, API Integration, HTTP, JSON, Authentication, CRUD

Databases: Supabase, PostgreSQL, MySQL, SQL Queries

Cloud & Deployment: Google Cloud Platform (project experience), Vercel, AWS (foundational knowledge)

Cybersecurity: Nmap, Wireshark, ExifTool, Steganography, Network Reconnaissance, Web Security, Cryptography

Systems & Tools: Kali Linux, Arch Linux, RedHat, Windows, VirtualBox, Git, GitHub, VS Code

PROJECTS

NEST-X — Cybersecurity Toolkit

Python | Security

- Developed a Python-based cybersecurity toolkit integrating 8 security utilities for reconnaissance, analysis, and security testing, including port scanning, hash analysis, encryption/decryption, steganography detection, and phishing detection.
- Designed modular, terminal-based utilities to simplify common provide an integrated workflow for security-focused tasks.

Cyberpunk 4.0 — Event Platform

React | Vite | JavaScript

- Developed and deployed a responsive event platform using React.js, Vite, and JavaScript, Google Cloud ,APIs featuring interactive event sections, animated interfaces, galleries, and dynamic navigation.
- Implemented registration workflows, form validation, responsive layouts, and frontend integration with registration data services while managing collaborative development through Git and GitHub.

ASCON — Encryption & Decryption System

Python | ASCON-128 | AEAD

- Implemented an E & D system using the ASCON-128 authenticated encryption algorithm to protect data confidentiality and integrity.
- Integrated secret key and nonce handling, ciphertext generation, and authentication-tag verification to support secure E&D workflows.

AQI Management System

HTML | CSS | JS | Supabase

- Built a database-backed Air Quality Index management application using HTML, CSS, JavaScript, and Supabase, featuring authentication and CRUD operations for AQI records.
- Implemented city and category management, alerts and a statistics dashboard with structured database operations and SQL constraints.

EXPERIENCE

JavaScript Intern — EWB Edutech Private Limited

Sep 2026 – Present

- Selected for a structured JavaScript Web Development Internship through the National Internship Portal, involving mentor-led technical training and practical development assignments.
- Applying JavaScript concepts through technical assessments, hands-on development tasks, and a final mini-project focused on strengthening frontend development capabilities.

Cyber Security Intern — SkillCraft Technology

Jul 2025

- Gained practical exposure to cybersecurity workflows, including reconnaissance, security assessment, and Linux-based security tools.
- Applied cybersecurity concepts through hands-on exercises involving security tools, system analysis, and vulnerability identification.

ACHIEVEMENTS

- Full Stack Developer
- Web Devlopement
- Java Programming
- Participated in cybersecurity CTF competitions covering Web Security, OSINT, Cryptography, Digital Forensics, and Reverse Engineering.

EDUCATION

St. Vincent Pallotti College of Engineering and Technology, Nagpur

Sep 2024 -Present

B.Tech in Computer Science Engineering (Cyber Security)

CGPA: 8.0 / 10
