SUMMARY

B.Tech Computer Science Engineering (Cyber Security) student with hands-on experience in cybersecurity and full-stack development. Skilled in building responsive web applications and Python-based security tools, with practical exposure to Linux/Kali Linux, web security, databases, and Git-based development. Active participant in CTFs and hackathons.

TECHNICAL SKILLS

Programming: Python, C, JavaScript, SQL

Web Development: HTML, CSS, JavaScript, React.js, Vite, Responsive UI

Cybersecurity: Nmap, Wireshark, ExifTool, Steganography

Systems & Tools: Kali Linux, Windows, VirtualBox, Git, GitHub, VS Code, Vercel

Domains: Cybersecurity, Web Security, Full-Stack Development

PROJECTS

NEST-X — Cybersecurity Toolkit

Python | Security

- Developed a terminal-based Python toolkit combining 8 practical utilities for reconnaissance, analysis, and security testing, including port scanning, hash analysis, encryption/decryption, steganography scanning, and phishing detection.

Cyberpunk 4.0 — Event Platform

React | Vite | JavaScript

- Developed a responsive event website with animated UI, event sections, gallery, routing, registration workflows, form validation, and mobile-friendly layouts; managed iterative development using Git/GitHub and deployment workflows.

ASCON — Encryption & Decryption System

Python | ASCON-128 | AEAD

- Implemented an ASCON-128 based encryption and decryption system using authenticated encryption, supporting plaintext, secret key, nonce, ciphertext, and authentication-tag verification for confidentiality and integrity.

AQI Management System

HTML | CSS | JS | Supabase

- Developed a web-based AQI management system with authentication, AQI record CRUD operations, city/category management, alerts, and a statistics dashboard, backed by relational database structures and SQL constraints.

EXPERIENCE

JavaScript Intern — EWB Edutech Private Limited

Sep 2026 – Present

- Selected for a **JavaScript Web Development Internship** through the National Internship Portal, gaining structured, mentor-led exposure to modern web development practices.
- Applying JavaScript concepts through **technical assessments, assigned development tasks, and a final mini project** to build practical development experience.

Cyber Security Intern — SkillCraft Technology

Jul 2025

- Gained practical exposure to cybersecurity concepts, security tools, and security-focused technical workflows through an internship environment.
- Applied security tools and Linux-based workflows for reconnaissance, analysis, and vulnerability-focused learning.

ACHIEVEMENTS

- SecLeaf Q2 CTF 2026: Ranked 113th among 1,050 teams; solved 22 challenges and earned 3,705 points.
- Participated in cybersecurity CTFs and hackathons covering web security, OSINT, cryptography, reverse engineering, and software development.

EDUCATION

St. Vincent Pallotti College of Engineering and Technology, Nagpur

Sep 2025 -Present

B.Tech in Computer Science Engineering (Cyber Security)
